

Phone Display Security **The BOSSystem**

The RS1 display stand for vertical wall mount. Extremely easy to operate. Customized to secure and display smart phones in less than 5 seconds.

- Powers and charges phones on display
- Keyless – arm and disarm with RFID User Card
- Warns staff against security mistakes and neglectance
- No visible wiring
- Mounted and secured in 5 seconds
- Collects data on display performance and consumer behavior
- Enables you to show product videos on external screens as consumers lift the phone

Display your phones as they were conceived. Don't let security taint the product experience. With the small RS1 POD you no longer need to worry about display security. Use the time to service your customers and maximize sales.

Simplicity sets us apart!

See for yourself, how easy you handle the BOSSystem RS1 Smart Phone Display Stand.

What you need. You decide how many PODs. The BOSSystem then handles each POD as a **stand-alone system**.
